

This EASTER....

*Rabbits make wonderful indoor companions when given proper care and understanding. Educating yourself about a rabbit's special needs **first** will prepare you for a rewarding lifetime adventure.*

- ✚ A large percentage of rabbits purchased, especially for Easter, are no longer wanted once the novelty wears off.*
- ✚ A prey animal by nature, most rabbits fear being picked up and held and can be seriously hurt if improperly handled.*
- ✚ Rabbits are high maintenance pets requiring the maturity of an adult caretaker and a long term (8-10 yr or more) commitment.*
